What is Bare.ID?

Tolleiv Nietsch - 2026-08-28 - Questions about the product

Bare.ID is a cloud solution for identity, authentication and authorization management offered by Bare.ID GmbH (AOE Group) as Software as a Service (SaaS).

Bare.ID enables companies, public organizations and associations to quickly secure login and authentication processes and protect themselves against the consequences of cyber attacks. Hosted, managed and operated exclusively in and from Germany, Bare.ID operates to the highest security standards and is **100 % GDPR compliant**.

At its core, Bare.ID uses the powerful identity and access management framework **Keycloak** and extends it with numerous customized features. Bare.ID provides a user-friendly interface to centrally manage all settings for a Bare.ID instance - from creating user accounts and managing roles and rights to customizing the login page according to your own design specifications. Third-party systems can be connected with just a few clicks, and security is enhanced with a wide range of multi-factor authentication options, brute force protection and password checking. The all-inclusive service, which includes consulting, setup, resilient hosting, and ongoing maintenance and development of the cloud service, makes Bare.ID a reliable and GDPR-compliant Identity and Access Management (IAM) solution from a single source.
